

## Position title: Faculty, Contributing (Part-Time) – School of Health Sciences

Walden University is an accredited institution that has been serving the higher education needs of professionals for more than 40 years. Offered online, Walden's doctoral, master's, and bachelor's degree programs are designed to help students achieve their goals so that, as graduates, they can help advance the lives of others.

As Walden grows, we continue its tradition of quality. Share your professional experience and academic knowledge with students across the country and around the world. With a computer and a high-speed Internet connection, you can teach on your own schedule while maintaining other professional and personal commitments.

### POSITION SUMMARY:

Walden University seeks dynamic, innovative faculty for this contributing (part time) position in the School of Health Sciences. Key responsibilities are to teach courses in graduate programs in the Master of Science Health Informatics program and Master of Public Health Program.

Contributing faculty members serve in a part-time capacity to educate Walden University Students by effectively and proficiently using online technology and resources so that knowledge, information, feedback, and critique are imparted to and shared with students in thoughtful, carefully formulated, well written, and timely communications. This is accomplished in an environment that is respectful of student, the Faculty Member, Walden University, and the discipline in which the Faculty Member is involved.

Teaching for Walden involves online course work, face-to-face interactions with students at University academic residencies, and dissertation mentoring.

Qualified candidates must have a doctoral degree in Health Informatics or a Master of Public Health AND a doctoral degree in a closely related field from an accredited institution. This is a virtual faculty position that will permit one to work remotely.

### EDUCATION AND/OR EXPERIENCE REQUIREMENTS:

- Earned doctorate from an accredited institution, preferably in a field related to health informatics or Public Health.
- Candidates must have recent or current work experience in the health information technology industry or public health demonstrating a record of intellectual and/or professional contributions to the field.
- Three to five years of master's level teaching experience that is relevant to the program is preferred
