Twenty HMI students receiving MHA and MSHI degrees participated in Graduate School commencement exercises on May 16, 2008 at the Mizzou Arena. They were honored earlier in the day with friends, family, and department members at a graduation brunch in the Great Room at Reynolds Alumni Center. Eric Rosenhauer (MHA 2007), Associate Director of Performance Improvement at University Hospital and Clinics, delivered the challenge to the class.

Several students were recognized for achievement:

Louis Magdits received the Thomas P. Weil Award recognizing him as the student who best represents the professional aspiration, creativity, values, and work ethic that are in keeping with the rich traditions of the HSM program. These qualities have become the hallmark of the program, as reflected in the careers and accomplishments of its alumni. The award was established by the alumni of the Health Services Management Program and is given to the student selected by his or her peers and faculty. The award honors Thomas P. Weil, PhD, the first director of the Health Services Management Program.

Matthew LeGrand and **Louis Magdits** received the Stuart A. Wesbury, Jr. Award in recognition for having achieved the highest academic performance of the graduating class. Established by the alumni of the Health Services Management Program, this annual award honors Dr. Stuart Wesbury, who formerly served as chairman of Health Services Management.

Wei Chan (Patrick) Teoh received the Donald A. B. Lindberg Award that recognizes a Health Informatics graduate who represents innovation, professionalism, and high principles, for outstanding work and dedication to the program. This award honors Dr. Donald A. B. Lindberg, the Director of the National Library of Medicine who began the development of informatics on the MU campus and is a distinguished national and international leader in medical informatics.
