Capital Region Medical Center is seeking a well-organized and energetic team member for the position of System Analyst. Primary responsibilities include the ability to create and maintain reports for data analysis, verify data base and data integrity, and provide written technical procedures and documentation for new and existing applications. Must be able to understand business needs and apply technology solutions to meet those needs.

Required Skills:
Working knowledge of relational databases and SQL, strong analytical skill set. Must be able to work independently as well as in a team environment with individuals at all levels of the organization.

Preferred Skills:
Project Management or Business Analyst experience. Experience working with reporting tools such as Cognos or SQL Reporting Services. Previous experience in a Healthcare Information Technology Department a plus.
